

CHOOSING COLOUR

YOUR GUIDE TO EXTERIOR
RESIDENTIAL **POWDER COATING**

Colour Choice

Create your own sanctuary from our collection of popular modern and contemporary RAPIDCURE™ colours.

Developed and manufactured in Australia for Australian conditions.

RAPIDCURE™ is ideal for exterior residential metal features and for most general industrial interior and exterior applications.

Performance

Meets the following performance standards:

- Australian Standard 3715-2002: Metal finishing - Thermoset powder coatings for architectural applications of aluminium and aluminium alloys.
- Australian Standard 4506-2005: Metal finishing - Thermoset powder coatings.
- American Architectural Manufacturers Association, AAMA 2603-2013.
- 10 Year Residential Durability Warranty* when applied by a Dulux® Registered Applicator on residential projects (NCC, BCA Volume 2, Class 1 and 10 buildings), up to 3 floors from the ground and greater than 100 metres from salt water.

*Subject to the terms and conditions of the product warranty. Please contact your Dulux Representative for further details.

Specifying the right product and colour

Some colours, whether powder, paints or furnishings may share the same colour name but be entirely different. This is especially true of other powder suppliers that use the same colour names for their products. To avoid disappointment when choosing colour remember to specify:

1. Dulux® RAPIDCURE™
2. Colour name and code.
3. To be applied by a Dulux® Registered Applicator in accordance with Australian Standard 3715 or AAMA 2603.

Less energy, faster production

When compared to standard cure products RAPIDCURE™ requires less energy to cure:

- 160° Celsius for 10 minutes (minimum)
- 180° Celsius for 5 minutes
- 200° Celsius for 2 minutes (maximum)
